HDMI cable

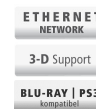

REFERENZ

HIGH SPEED HDMI CABLE WITH ETHERNET

The Reference High Speed HDMI cable with Ethernet has an additional data channel (ethernet channel) and enables AV components to be linked up to the Internet without the need of extra network cable. Using the Audio Return Channel, audio signals can be sent back from the TV to the AV receiver. Additional features, such as extra large conductor diameter or silver-plated and solid data lines, ensure optimum picture quality.

- 3-fold shielding
- Silver-plated solid conductors
- Solid metal plugs
- Conductors made of high-purity OFC copper
- 24c gold-plated contacts
- Extra large conductor diameters

EXZELLENZ

EXCELLENCE WIRELESS HDMI KIT

The Excellence Wireless HDMI Kit | 3D provides wireless transmission of picture and sound signals over distances of up to 30 m*. The kit supports Full HD, 3D and multi-channel audio formats. The set includes a transmitter and a receiver which are connected to the source or the TV via the HDMI interface. For ease of use, commands from IR remote controls can be transmitted back to the source via the return channel and the included IR sensors. The transmitter also has an HDMI output with a loop-through function. A TV positioned near to the source can be connected to the output at the same time.

- Supports Full HD 1080p
- Supports deep colour
- Supports HDCP 2.0
- Supports 3D
- Supports multi-channel audio formats
- Additional HDMI output on the transmitter (loop-through)

EXZELLENZ

EXCELLENCE HDMI MATRIX 4 x 2 HIGH SPEED / SP-DIF | 4K

The Matrix supports the new 4k Ultra HD video format. Up to four source devices and two displays (e.g. TV or projector) can be connected to it. Independently from one another, the matrix can assign each of the four inputs to each of the two outputs. This means that two different sources can be reproduced at the same time and displayed on one TV. In addition to output A, a digital S/P-DIF audio output (optical and coaxial) is also available. It can be operated directly on the device or by using the efficient remote control. Mobile devices can be plugged in conveniently to the HDMI connection on the front.

- Supports 4k Ultra HD formats
- EDID generator
- Remote control
- 3D support
- Digital audio output
- HDMI input on the front for mobile devices

HDMI SWITCH 4K 4 -> 1 HIGH SPEED

"The premium HDMI switch has four HDMI inputs and one HDMI output. It is a convenient solution when devices are set up far from each other, because only one long HDMI cable (instead of four) has to be laid to the TV or projector. The splitter supports the new, high-definition 4K Ultra HD and 3D formats. It is backward compatible with lower resolutions such as Full HD 1080p. For connecting mobile devices, one of the inputs is on the front of the device and supports the MHL standard. The inputs can be switched directly on the device or using the remote control supplied with it." MHL standard. The inputs can be switched directly on the device or using the remote control supplied with it."

- Supports 4K Ultra HD formats
- Picture-in-Picture-Function
- CEC pass Through

EXZELLENZ

HDMI REPEATER

The Excellence HDMI repeater boosts and corrects digital picture and sound data. It also allows large transmission distances between the HDMI source and receiver. It does not require a separate power supply and can be easily connected with plug & play.

- Allows transmission distances of up to 60 metres (e.g. 2 x 30 m)
- No separate power supply required
- Plug & Play connection
- Compact design
- 24c gold-plated contacts

Screen-Clean cleaner for screens

The surface of TFT | LCD | PLASMA displays consists of a sensitive plastic that can be easily scratched. Most flat-panel displays are also coated with an anti-reflective coating. This cleaner guarantees effective and gentle cleaning of the screen surfaces. Simply spray the screen cleaner onto the included microfibre cloth and clean the display. The cleaner is suitable for maintenance of flat-panel displays, TFT displays, digital cameras, smart phones, tablet PCs and laptops.

- ★ TÜV tested
- ★ Enables gentle cleaning
- ★ Suitable for LCD, TFT, plasma displays
- ★ Without propellant gas

Speaker cable

REFERENZ

LS-2404

With the LS-2404 we have moved on to the fourth generation of Referenz speaker cables. The improvement in sound from the high-speed hollow conductors introduced in the third generation was so overwhelming that we have further refined and optimised the technology. In addition to the waveguide design, where the individual copper wires are arranged around a polyethylene core, in the fourth generation the copper wires are lacquered as insulation from each other. This prevents chaotic and undefined contact between the copper wires, which might otherwise lead to uncontrolled eddy current. As well as this, the new cables are characterised by extremely low inductivity. A total of 24

- ★ 24-fold Multicore
- ★ Concentric Copper
- ★ PE network jacket reduces micro-vibrations and capacitance
- ★ Super Speed waveguide technology
- ★ DUO-PE II insulation around each conductor
- ★ High Power Management

REFERENZ

LS-1603

The basis of the new Reference LS-1603 is the high speed waveguide technology especially developed for this purpose. Oxygen-free (OF) copper wires are wrapped around a polyethylene core and sealed with the proven DUO-PE II insulation. The LS-1603 has 16 of these high speed waveguides, which are finally tuned to each other and stranded in groups around a polyethylene support (16-

REFERENZ

LS-1203

The Reference LS-1203 has the same technological basis as the LS-1603. It also features the high speed waveguides. The actually usable cross section of these circular waveguides remains constant for all sound frequencies. The result: an extremely homogeneous, balanced loudspeaker cable with a wide-ranging sound spectrum.

- 12-fold Multicore
- Concentric Copper
- PE network jacket reduces micro-vibrations and capacitance
- High Speed waveguide technology
- DUO-PE II insulation around each conductor
- High Power Management

REFERENZ

LS-803

The little brother of the LS-1203 has an 8-fold multicore design. The tightlypacked PE-Network Jacket holds the wires together and reduces micro-vibrations (High Power Management), which occur in the cable from the changing magnetic fields in the beat of the music. The cable therefore also transmits high level and extreme dynamic peaks with absolute precision.

- 8-fold Multicore
- Concentric Copper
- PE network jacket reduces micro-vibrations and capacitance
- High Speed waveguide technology
- DUO-PE II insulation around each conductor
- High Power Management

REFERENZ

LS-1102

The Reference LS-1102 has six conductors each with 37 concentrically stranded wires. The strands are in triple symmetry and specifically arranged in the CC-187 design to keep the inductance low and the resistance linear. The total cable cross-section delivers outstanding and controlled low frequency reproduction with high effectivity.

- Hexa CC-187 design; 6 x 1.87 mm²
- 37 wires concentrically stranded per conductor
- PE network jacket reduces micro-vibrations and capacitance
- 3-fold symmetrical design
- DUO-PE II insulation around each conductor
- Low induction for homogeneous reproduction

REFERENZ

LS-1002

The Reference LS-1002 consists of four wires in the CC-297 design. The conductors are arranged in double symmetry each with 37 concentrically stranded wires. The large cross-section ensures a wider base and depth.

- Quatro CC-297 design; 4 x 2.97 mm²
- 37 wires concentrically stranded per conductor
- PE network jacket reduces micro-vibrations and capacitance
- Double-symmetrical design
- DUO-PE II insulation around each conductor
- Low induction for homogeneous reproduction

REFERENZ

LS-602

The Reference LS-602 is a double-symmetrical cable design. The high density reduces the inductance factor to the benefit of the medium and high-frequency ranges.

- Quatro CC-187 design; 4 x 1.87 mm²
- 37 wires concentrically stranded per conductor
- PE network jacket reduces micro-vibrations and capacitance
- Double-symmetrical design
- DUO-PE II insulation around each conductor
- Low induction for homogeneous reproduction

REFERENZ

LS-502

The LS-502 has two symmetrically arranged strands, each containing 37 concentrically stranded wires. The thick wires demonstrate its class even when used with high-performance systems.

- ★ Duo CC-297 design; 2 x 2.97 mm²
- ★ Symmetrical design
- ★ 37 wires concentrically stranded per conductor
- ★ DUO-PE II insulation around each conductor
- ★ PE network jacket reduces micro-vibrations and capacitance
- ★ Low induction for homogeneous reproduction

EXZELLENZ

Exzellenz LS-40

The speaker cable Exzellenz LS-40 is based on the technical principles of the legendary Reference Series. It consists of four twisted wires. The PE Network Jacket holds the wires tightly together. The insulation is made of high quality, solid PE (Polyethylene). The elaborately finished cable offers a powerful, dynamic and very clear sound. The 4-wire construction allows the use as a single bi-wire cable.

- ★ 2 x 5,0 mm² (4 x 2,5mm²)
- ★ Low-loss PE insulation
- ★ Copper wires with 50 x 0.25 mm strands
- ★ Additional support elements made of PE
- ★ Double symmetrical, 4-wire construction
- ★ Low induction for homogeneous high-frequency reproduction

EXZELLENZ

SPEAKER CABLE MSR

The Excellence speaker cables MSR use the legendary MSR®-technology (magnetic current reflector). The basis for this is the so-called proximity effect in which adjacent conductors cause an uneven distribution of the electric current. Basis of the patented MSR®-technology is a fine copper strip placed between the conductors which reduces the proximity effect of the two conductors.

- ★ MSR®-Technology
- ★ Pure grade (oxygen free) copper
- ★ Finest stranded (strand diameter 0,07 mm)
- ★ 1302 / 2100 / 3150 strands
- ★ Highly flexible

SPEAKER CABLE SILVER

On the whole, highly-flexible wires have a larger conductor surface compared to solid designs. This benefits the transmission of high frequency ranges. As well as the fine wire design (0.07 mm), the silver-plating of the Excellence Silver also supports the transmission of high frequencies. The low-loss PE wire insulation and the additional PE dielectric also relieve the burden on the amplifier. For more dynamics and pleasure.

- High frequency range optimised, silver-plated concentric copper
- Additional PE dielectric
- Low-loss PE insulation
- Finest 0.07 mm wire design
- Opposing S/Z stranding (easy to install)

SPEAKER CABLE SUPER FLAT

The super flat speaker cable with ten separate insulated solid conductors made from OFC copper ensures tight and precise sound transmission. Easy to lay in tubes under the carpet or behind the skirting boards. On the wall with the white side, on the parquet floor with the brown side. Practical with a great sound.

- Solid conductor (2 x 5 x 0.5 mm²) for more dynamics
- Super flat
- Two colour insulation , "hidden" cabling
- Plus/minus recognition

REFERENZ

BANANA BFA-103 | 45°

The angled shape of the new BFA-103 banana plug relieves the strain on the contact sleeve and the device socket. This facilitates the connection of heavy high-end cables without damaging the plug or connection terminals on the device. In addition the angled cable route saves space behind devices and loudspeakers.

The body of the plug consists of a solid socket with two hexagon head screws and can accommodate cables with a cross-section of up to 10 mm² or a diameter of up to 7.5 mm. All contact elements are coated with rhodium and guarantee long-lasting low contact resistance.

REFERENZ

REFERENCE LS-1603 BI-WIRE JUMPER

High-end bi-wire jumper based on the LS-1603. Fitted with the KS-103 Reference spade lug or BFA Banana. The rhodium surface treatment is extremely durable. The contact surfaces and the screw connection are manufactured from a single piece, allowing contact resistance to be avoided. The spade changes shape. The contact surface of the spade, which is slitted on the side, changes to a concave shape when the screw connections are tightened, thus preventing the spade lug from sliding out.

REFERENZ

REFERENCE NF-2404

The Referenz NF-2404 is a cable that again raises the bar and approximates the ideal of pure air insulation as closely as never before. For this product, in-akustik has designed a special clip: Inside the cable, many of those clips are arranged to form a special helical support holding two symmetrically arranged conductors freely in the air while maintaining the exact distance to the shield. The structure is highly flexible thanks to two crosspieces that do not only interconnect the clips but also ensure highly accurate spacing. The clips are meticulously assembled by hand at the on-site factory and then threaded into the Super Speed waveguide. The resulting Air Helix is then provided with a

- Air Helix structure
- Super Speed waveguide
- PE network jacket preventing micro-vibrations
- Extremely low capacities thanks to air dielectric
- Low longitudinal inductance resulting from braided lacquered
- Braided shield made of low-oxidation copper

REFERENZ

REFERENCE NF-1603

Due to the large effective overall surface of the six high-speed signal conductors, the Reference NF-1603 becomes a powerful high-end link. At the same time, the DUO-PE II insulation and the air-filled PE tubes reduce unwanted capacitance and enable the signal source to work comfortably. The GAP II screening of the NF-1603 is a combination of lacquer-insulated wires and an aluminium-coated film with an air gap. The screening prevents the formation of interfering eddy currents. Another highlight of the third-generation is the GAP II cinch plugs, which ensure three-way symmetry in this connection. As an alternative, this cable is also available as an XLR version. The PE network jacket also

REFERENCE NF-1203

Four high-speed signal conductors provide the signal transport for the NF- 1203. The DUO-PE II insulation and the air-filled PE tubes reduce undesired capacitance. The GAP II screening of the NF-1203 consists of lacquerinsulated wires. It prevents the formation of interfering eddy currents. The PE network jacket also prevents micro-vibrations. Another highlight is the solid Reference XLR plugs, which round out the two-way symmetry of this connection. As with the NF-1603, the NF-1203 is available either with GAP II cinch plugs or as an XLR version.

Digital coax

REFERENZ

DIGITAL CABLE ON/OFF-202

In normal coaxial digital cables, the shielding is also used for the return signal. The reference On/Off-202 digital cable has a separate conductor for the return signal and also has a double shielding. The twisted pair design ensures extremely large data rates with low jitter. The cable exactly maintains a specified characteristic impedance of 75 ohms, keeping inductance and capacitance in perfect balance.

Silver-plated solid conductor for a high bandwidth

DUO-PE II insulation around each conductor

Twisted pair technology: twisted conductor and return conductor

Fitted with low-loss GAP RCA plugs

Double shielding (Foil and braid shielding)

Home HiFi accessories

REFERENZ

REFERENCE HIGH TECH GEL ABSORBER

High-end and hi-fi systems are a combination of highly precise and delicate devices. Perfectly attuned to each other, they allow music to be played back in outstanding quality. So that all components can work without interference, just like sensitive measuring equipment, they need to be kept free of vibrations and shocks as far as possible. Vibrations are caused in different ways and they can be transmitted by structure-borne and airborne noise. The combination of airborne and structure-borne noise causes all of the components of the hi-fi system to vibrate mechanically. Experiments have shown that this has a considerable impact

- ★ Hightech Absorber Gel
- ★ 12 (3 x 4) Hightech Gel pads in the set
- ★ Felt pads and adhesive pads included
- ★ Top and bottom part made from stainless steel
- ★ Covers four weight classes from 5 to 40 kg
- ★ Dimensions approx. 45 x 11.5 mm (D x H)

OBJ. ČÍSLO	EAN				VELKÉ BALENÍ	CENA S DPH

STAR

STAR AUDIO DIGITAL CONVERTER (USB POWERED)

The Star Sudio Digital Converter converts digital audio data into analog signals. Ist application range is by the optical (Toslink) and coaxial (RCA) input very universal. The converter can be used, for example, for the faint sound of a new flat-screen television on an older but sound quality hi-fi player. The stereo output provides to the usual line-level and can be connected, for example, to the AUX or ,TV input of the amplifier. Power supply using AC adapter or through USB.

Record Slipcover

The good old record has a special meaning for many people, whether because of its rarity, its particular sound or the personal, sentimental value and emotional moments associated with it. The high-quality Premium Record Slipcover from in-akustik preserves these values. They protect the records from dust and other impurities. They are made of anti-static HDPE (high density polyethylene) that prevents electrostatic charge on the vinyl. This decreases the attraction of new dust particles and reduces crackling during play back. The special format offers a particular advantage. One side is rounded off meaning the record inner sleeves easily slide into LP covers and paper sleeves. This is

- ★ Antistatic
- ★ Half-round fit
- ★ 40µ HDPE

Premium carbon-fibre record brush

A thin film of dust deposits on the record due to the static charge. This has an unfavourable effect on the sound and also increases wear on the record as the needle moves across the surface. This antistatic carbon-fibre brush, with more than a million extremely fine fibres, is especially effective at removing even the tiniest grains of dust and particles of dirt from the record grooves. The static charge is also greatly reduced. The result is an audibly improved sound experience and a longer life for your record collection.

- ★ Eliminates static discharge on both sides
- ★ Protective guard with stripping edge for cleaning the fibres
- ★ More than a million conductive carbon fibres
- ★ Reduces crackling noises

PREMIUM

Premium Cable Conduit

Hi-fi, TV and computer devices have to be connected with a great many signal and power cables. These cables can often impair the appearance or become trip hazards. This high-quality fabric cable conduit allows cables to be bundled together in an attractive manner. The conduit has been designed so that it can accommodate power cables with large (Schuko) plugs. It can be cut to the required length conveniently with a pair of scissors. One notable feature is that the fabric at the ends does not fray as easily as other conduits.

- Simple to cut
- Reduced fraying at the ends
- Diameter: 25-38 mm
- Stabilised braid
- Length: 38 m
- Colour: grey

PREMIUM

Premium Slitted Cable Conduit

Hi-fi, TV and computer devices have to be connected with a great many signal and power cables. These cables can often impair the appearance or become trip hazards. This high-quality fabric cable conduit allows cables to be bundled together in an attractive manner. The conduit is slitted and rolls together in an overlapping manner of its own accord. This means that the cables do not need to be pushed through the conduit but can be conveniently inserted in the conduit over its entire length.

- Slit at the side
- Nominal diameter: 19 mm
- Colour: black
- Rolls together in an overlapping manner of its own accord
- Length: 38 m

Mains cables / Power bars

REFERENZ

POWER BAR AC-2502-SF8

This power bar has two groups of sockets: Group 1 is directly and permanently connected to the mains supply. It is made for power amplifiers or other power-hungry devices that should not be disconnected from the mains. Group 2 can be separated from the mains supply using a switch. The additional mains filter makes this group especially suitable for devices such as CD players, pre-amps and other precision electronics.

- 8 AC power sockets
- 3 x 2.5 mm² cable, mylar foil shielded
- Foil shielding and additional shielding wire
- In-Plug Filter in the AC plug; 2Y-Filter in the power bar
- Power bar (8 mm²) for even power distribution
- Fully shielded metal housing

POWER BAR AC – 25.6

stable power supply forms the basis of good quality pictures and sound. Unfortunately, a great deal of quality is often lost due to high contact resistance when using cheap power bars. This is characterised by limited dynamics and slurred bass even at low and medium volumes. The Excellence AC 25.6 power bar consists of high quality, perfectly matched materials such as the solid power plug and the 3 x 2.5 mm² strong power cord. In connection with the solid 4 mm² copper power bars in the strip, the setup ensures low contact resistance and enables the system to reach maximum performance. The

Amplifiers

PREMIUM

HEADPHONE AMP NO.1

The headphone outputs of mobile devices such as smartphones, tablets and laptops are not usually very powerful. This often impairs audio quality. The Premium Headphone Amp No. 1 takes the strain off of the device outputs. Its high-quality analogue amplifiers are optimally tuned to each other. They drive and control the connected headphones with exceptional accuracy and provide greater volume, dynamics and precision. In addition, the unit also protects the battery of the mobile device and increases its service life. The Premium Headphone Amp No. 1 also has a high-quality digital/analogue converter to replace the integrated, usually basic, sound cards of devices such as PCs and laptops.

- Two headphones jacks
- Integrated USB Digital Analog Converter
- Black brushed aluminium housing
- Integrated USB Digital Analog Converter
- Latest chip technologies
- Super-flat design (13 mm)

PREMIUM

PREMIUM BLUETOOTH AUDIO RECEIVER

Enjoy your favourite music from your smart phone, tablet PC or laptop – as well as from your iPhone or iPad – conveniently and wirelessly on your high-end hi-fi system. Thanks to the special aptX technology, you can also enjoy first-class CD quality. The Premium Bluetooth Receiver supports all common standards such as A2DP and SBC and is compatible with almost all Bluetooth-capable devices regardless of brand. The Premium Bluetooth Receiver stores up to eight devices. Once these devices are paired with the receiver, they are automatically recognized again, allowing the connection to be more quickly reestablished.

- Play media content wirelessly on a hi-fi system
- In superb CD quality
- The Bluetooth Receiver stores up to eight devices.
- Including optical output

USB 2.0 Cable

REFERENZ

HIGH SPEED USB 2.0

The Reference USB 2.0 cable has been designed especially for low-loss HD audio streaming. The data lines consist of fine, separately lacquer-insulated copper wires (high speed conductors). In combination with the high-quality materials, they reduce the jitter effects that particularly affect the sound quality when streaming audio data. Sensitive data is additionally protected by 4-fold shielding. Extremely generously proportioned cables for the power supply of e.g. external hard drives minimize voltage fluctuations.

- High speed data cable
- 4-layer shield
- Reference metal plug
- Special data cable insulation
- PE-network Jacket
- Very low jitter

CAT6 cable

REFERENZ

REFERENZ NETWORK CABLE CAT7

The CAT7 Referenz cable is a LAN cable for high-end network connections. Because of the high production quality, it well surpasses the specifications required by EN50288-4-2 / IEC61156-6 (600 MHz), and reaches band widths of over 1200 MHz. This makes it equipped for high-speed networks with 10 Gbps (10 Giga bits per second). It was however, through exacting maintaining the impedance of its data lines, especially conceived for low-loss HD audio and HD video streaming. The PE-Network Jacket also prevents disturbing microvibrations, while the high-grade CAT Referenz plug rounds the product off.

Four twisted-pair data lines

Data pairs equipped with separate foil shielding

PE-Network Jacket

Foamed PE lead insulation

Common braided shield

Referenz metal plug

HDMI/CAT Extender

EXZELLENZ

HDMI TCP/IP EXTENDER SET

HDMI Extender by TCP/IP is based on TCP/IP standard. It extends your HD display with the resolutions of 1080p/60Hz up to 330 feet (100 meters) away from your HDMI or DVI-D source by using one CAT5e/6 cable. Thanks to the use of the TCP/IP protocol, you can transfer your high-definition video over an existing TCP/IP network. Total distance can be up to max 660 feet (200 meters).

- Supports a bandwidth of 3 x 1.65 Gbps / 165 MHz
- EDID, HDCP compatible
- CAT connections according to IEEE-568B
- Uses the TCP/IP standard protocol
- Supports 1080p (Full HD); 50/60 Hz
